

EZ Zip Loader™

OVERHEAD MAIL STORAGE SOLUTION

Increase operator efficiency while improving sort quality with the EZ Zip Loader

- No additional floor space required!
- Hinged design provides easy access to sorter.
- Reduces risk of mail rejection by the US Postal Service.
- Durable welded stainless steel construction.
- Adjustable height settings for the shelves.

Hinged shelves for easy access to mail stream.

EZ Zip Loaders on a Bell & Howell J-3000

EZ Zip Loader™ keeps the automation in your automated mail sorting equipment, providing an organized method of staging and storing mail directly over the sorter. Each mail tray is located directly above a sort bin, creating a one to one relationship between the two. This "one to one" relationship minimizes the chances for incorrect sorts. As mail is swept from the sort bins, it is moved directly up to the corresponding mail tray. Rejection by the US Post Office due to incorrectly sorted mail can be very costly to your organization in both time and effort.

Not only does the EZ Zip Loader system maintain the quality of sorting, it also provides a substantial savings in labor. Mail is handled in a faster and more efficient manner, resulting in less manpower hours to sweep the bins. Sorter output is increased due to fewer bin stoppages and jams.

EZ Zip Loaders are constructed of high quality stainless steel, with a brushed finish, providing a durable, profit saving product that enhances the appearance of the sorter. The height above the sorter can be adjusted for operator convenience, and each tray shelf can be raised and locked to provide ease of access for sorter servicing.

EZ Zip Loaders are available to cover a variety of sorter makes and models.

Have a vertical sorter? Ask about our EZ SortCart VS™ mail tray storage and transportation system.
